THE ONLY REALLY

Dwarf Salvia Splendens, "Lord Fauntleroy"

The illustration is engraved from a photograph of **one** plant, measuring only 18 inches high from the ground to the tips of the spikes. This is a fair average specimen, and we have found in two years' trial that

it comes strictly true from seed. It will at once be seen that for bedding this new Salvia is fully as suitable as geraniums in respect to height and compactness, while in brilliancy of color it eclipses anything in nature. We have counted over one hundred spikes of bloom on a single plant. The foliage is of a very rich dark green color, beginning right at the ground and rising no more than ten inches above, while the 8-inch flower spikes stand erect and clear above the foliage. For bedding in masses alone, or with plants of equal height, or for borders around beds of taller plants, we know of nothing that will be so effective.

Retail price, 25c. per packet

Albert's Plant-Food

THE BEST FERTILIZER FOR HOUSE PLANTS

The style of the very handsome tins in which this celebrated German Plant-Food is put up is shown by our cut. Full directions for application are given on the outside of each tin. The lid can be removed by hand and replaced so as to keep the fertilizer absolutely air-tight. It is also much more convenient for mailing than any style of fertilizer package now on the market.

It is to its *quality*, however, that we attach most importance, the analysis being as high as it is possible to make a chemical plant-food, which at same time can be used without risk of injury to the plants.

It is a scientific preparation containing in a highly concentrated and easily soluble form the food elements required by plants. It is odorless, clean to handle, quick in its action, and unequalled in its effects. Inside each tin is a small spoon holding the exact quantity required for dissolving in a quart of water. By its use plants acquire a sturdier growth, fuller development and a manifold increase in bloom. For palms, ferns, India rubber plants, bulbs, and all kinds of pot-plants, it is by far the most complete, most effective, most economical and easiest applied fertilizer made.

We are **sole agents for the United States**, and as an inducement to catalogue a really genuine article that will sell well, we offer it at the following low price:

15 cents per can

Vick's Early Scarlet Globe Radish.

As a forcing Radish the Early Scarlet Globe has established a reputation as a leading sort—the best in every way. It is handsome in form and color—a beautiful oval and rich scarlet. The amount of foliage is small compared with other varieties and small for the size of radish. The peculiar merit of this variety as a forcing radish is that it will bear the heat requisite for forcing without becoming pithy or spongy. The flesh is crisp, tender, juicy and mild; it is equally as good for open ground as for forcing, and therefore it commends itself equally to the amateur and to the market gardener.

Oz., 10 cents.

¼ lb., 25 cents.

Lb., 75 cents.

Detroit Dark Red Turnip Beet.

Long experience has shown this variety of our own introduction to be the best deep red turnip beet not only for market gardeners but for home use. It is also by far the best for canning, making a strikingly handsome product much superior to that obtained from any other variety; its small, upright growing tops only maturing, and the splendid shape and color of the roots make it popular with every one who plant it. Top small upright growing so that the rows may be close together; leaf stems and veins dark red, blade green roots, globular or ovoid peculiarly smooth. Color of skin, dark blood red; flesh, blood red, zoned with a darker shade. Very crisp, tender and sweet and remaining so for a long time. We believe that the stock of this variety which we offer will produce a crop more uniform in shape, color and quality than any other beet seed obtainable.

Oz., 10 cents.

¼ lb., 20 cents.

Lb., 70 cents.

FERN BALLS (Davallia Bullata.)

We have imported some of these interesting Ferns from Japan. They are easily grown and occupy little space, being suspended in the room. In the fall the leaves die off, and the plants need a rest for two months, during which time it is recommended to keep them out of doors. The frost does not hurt them, but when taking them in, they should be gradually thawed out. We handle only the long-leaved variety.

Priced, extra large size, 39 cents each; second size, 25 cents each.

1903 MUZZY BROTHERS' 1903 Annual Catalogue of Seeds

ARTICHOKE.

French Globe German, *Artichoke*; French, *Artichaut*; Spanish, *Alcachofa*. Per oz. ¼ lb. Per lb.
\$0 35 \$1 00 \$3 50

The seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep, rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue in bearing for several years.

ARTICHOKE—JERUSALEM.

Tubers 3 lbs. by mail for \$1.00 . . . Per qt. Per peck
\$0 20 \$1 00

ASPARAGUS.

German, *Spargel*; French, *Asperge*; Spanish, *Esparrago*.

	Per oz.	¼ lb.	Per lb.
Columbia , producing pure white shoots	\$0 10	\$0 20	\$0 50
Conover's Colossal	10	20	50
Palmetto , a light green variety	10	20	50
Roots, Colossal Two years old, per 100	75;	per 1000,	5 00
" Palmetta " " "	75;	" "	5 00
" Columbia " " "	1 00;	" "	6 50

Sow the seed early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds, which should be done in the following manner, as described by a cultivator of Oyster Bay Asparagus,

"Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

"In planting for private use, set out in rows two feet apart, and allow 12 inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.

"If the plot is made sufficiently rich when the plants are set, they will make a large growth the first summer, and the shoots may be cut from them the succeeding year. Any well treated plot ought to produce a moderate crop the second year after planting. Remove the dead brush late in the fall or early in the spring of each year, and apply broadcast a dressing of manure. A plot of Asparagus will reach its maturity in its fifth or sixth year, after that the size of the shoots will diminish, but their numbers will increase."

BEANS—ENGLISH OR BROAD.

German, *Gartenbohne*; French, *Fève de Marais*; Spanish, *Haba*.

	Per pt.	Per qt.	Per peck
Early Mazagan , earliest variety	—	\$0 25	\$1 25
Broad Windsor	—	30	1 50
Sword Long-pod	—	25	1 25

This class is very hardy and should be planted as soon as the soil is in good state in spring. Plant four inches apart and two inches deep, in drills four feet apart. To insure well-filled pods, pinch off the top as soon as the lower pods begin to set.

BEANS—BUSH OR SNAP VARIETIES.

German, *Bushbohnen*; French, *Haricots nains*; Spanish, *Habichuelas enanas*.

	Per qt.	½ peck.	Per bu.
New Everbearing , prolific, very early	\$0 30	\$1 00	\$6 00
Muzzy's Stringless Green Pod , two weeks earlier than Valentine, very tender	30	75	5 00
Marvel Paris , early, long, and slender pods, very productive	30	1 00	6 00
Livingston's Round Pod Six-Weeks Bean	30	1 00	5 50
Early Valentine , early, productive, tender, and of excellent flavor	25	75	4 50
Early Plover , very productive and of good quality	25	75	4 25
Early China , very early and of fine quality	25	75	4 50
Long Yellow Six-Weeks , early; an excellent variety for general crop	25	75	4 50
Ne Plus Ultra , extra early variety for forcing green	30	1 00	5 50

Columbia White Asparagus.

BEANS—BUSH OR SNAP VARIETIES—Continued.

Burpee's Bush Lima Beans.

	Per qt.	½ pk.	Per bu.
Refugee, or Thousand to One, extensively grown for pickling	\$0 25	\$0 75	\$4 50
Long White Kidney, excellent as a shell bean, green or ripe	25	75	4 00
White Marrowfat, extensively grown for sale in the dry state	20	75	3 50
Golden Refugee, pods round and light color	25	75	4 50
Flageolet Green Seed, used as a shell bean when green	35	1 25	8 00
Dwarf White Lima	35	1 25	7 00
Burpee's Bush Lima, large and flat, very productive	35	1 25	7 00

DWARF WAX VARIETIES.

Thorburn's Valentine Wax, improved extra early Valentine, round wax pods	30	1 00	5 50
Wardwell's New Dwarf Kidney Wax, extra early, long pods, very productive	35	1 25	8 00
Black Wax, or Butter, pods of a waxy yellow, transparent and very tender	35	1 25	7 00
White Wax, beans pure white, pods yellow, tender and rich	35	1 25	7 25
Golden Wax. This valuable variety is about 10 days earlier than the Dwarf Black Wax, and the pods are large, long, brittle, entirely stringless	35	1 25	7 50
Yosemite Mammoth Wax, the largest pods of all the Wax Varieties	60		
Flageolet Wax Red, pods large and very tender	30	1 00	6 50
Algerian Wax, very productive, round pods	30	1 00	7 50
Detroit Wax, similar to Golden Wax, less rust	35	1 25	7 00

Early Red Valentine Beans.

BEANS—POLE OR RUNNING VARIETIES.

	Per qt.	½ pk.	Per bu.
German, <i>Slangenbohnen</i> ; French, <i>Haricots a rames</i> ; Spanish, <i>Judlos</i>			
Challenger Lima, potato variety, 5 and 6 in a pod	\$0 35	\$1 25	\$7 00
Horticultural Lima, a cross between a Horticultural and Dreer's, being earlier than the Lima	30	1 00	6 50
King of the Garden Limas, large pods, very productive	30	1 25	7 00
New Early Jersey, very early	35	1 25	7 00
Large White Lima, a greatly esteemed variety	35	1 25	7 00
Dreer's Improved Lima. This variety has proved to be a decided acquisition	35	1 25	7 00
Small White Lima. Small, but good quality	35	1 25	7 00

BEANS—POLE OR RUNNING VARIETIES—Continued.

	Per qt.	½ pk.	Per bu.
Dutch Case Knife , a very productive variety, and one of the earliest	\$0 30	\$1 00	\$6 00
Horticultural, or Speckled Cranberry , a popular variety for private use, equally serviceable in the green state or when shelled	30	1 00	6 00
Scarlet Runner , beautiful scarlet flowers for ornamental and table use	35	1 25	7 00
Black Wax , pods long, thick and fleshy; pale yellow color; waxy appearance; very productive and tender; excellent as a snap or shelled green	35	1 25	7 00
Mont d'Or , Golden Wax pods; early	35	1 25	7 00
French Yard Long Pods , two or three feet long	35		7 00
Flageolet Wax Pole , large yellow, stringless	30	1 00	6 50

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drills; cover two inches or less; for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled warm weather; make rich hills, four feet apart each way; set a pole eight or ten feet high in each; press the beans into the soil *eye down*, six or eight to each pole, and when they are well up, thin out to four. A quart of Limas is sufficient for 75 or 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

BORAGE.

German, *Borritch*; French, *Bourrache*; Spanish, *Berraja*.

	Per oz.	¼ lb.	Per lb.
Used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks, Bees are very partial to the flower	\$0 15	\$0 40	\$1 25

BEET.

German, *Runkelrub*; French, *Betterave*; Spanish, *Remolacha*.

Early Egyptian Beet.

select dark Red Turnips

	Per oz.	¼ lb.	Per lb.
Dark Red Egyptian , the earliest beet in cultivation, color deep crimson; of excellent quality	\$0 10	\$0 20	\$0 50
Extra Early Eclipse , very early, good size	10	20	50
Carter's Excelsior	10	20	60
Early Flat Bassano , chiefly valuable for its earliness	10	20	50
Early Blood Turnip , standard Early sort, an excellent variety	10	20	50
Edmand , market garden variety, uniform shape, dark	10	20	50
Dewing's Blood Turnip , of fine form and flavor	10	20	50
Bastian's Blood Turnip	10	20	50
Long's Smooth Blood Red , an excellent late variety	10	20	50
Swiss Chard , used for its leaves, which are cooked as spinach	10	20	50

BEETS—Continued.

MANGEL-WURZEL AND SUGAR.

Varieties used for feeding stock. Sow 6 lbs. per acre.

	Per oz.	Qr. lb.	Per lb.
Mammoth Red Mangel-Wurzel , producing roots of mammoth size, very regular and with a small top	\$0 10	\$0 15	\$0 35
Yellow Globe Mangel-Wurzel , roots very large and globular	10	15	35
Long Yellow Mangel-Wurzel , good for general crop	10	15	35
Golden Tankard Mangel-Wurzel , a new and very valuable variety, of fine form and of very sweet flavor, and bright yellow in color; when cut it shows the interior rings similar to most varieties of garden beet	10	15	35
White Silesian Sugar Beet , extensively grown for feeding stock and manufacture of sugar	10	15	35
Vilmorin's Improved Sugar Beet , an improved variety	10	15	35
Lane's Imperial Sugar Beet , improved variety of the French Sugar Beet, obtained by careful selection in this country	10	15	35

A rich, deep, open soil is the best suited to the culture of Beet; fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. For an early supply sow in spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand, in the cellar or outhouse. Before storing leaves and fibres must be trimmed off, but care must be taken not to bruise the main root.

BRUSSELS SPROUTS.

German, *Sprossen-Kohl*; French, *Chou de Bruxelles*; Spanish, *Berza de Brusels*.

	Per oz.	Qr. lb.	Per lb.
Imported Seed (French)	\$0 20	\$0 50	\$1 75
Dwarf Improved , a variety producing compact sprouts of excellent quality	20	60	2 00

A tender and delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbages. The leaves, which look like the Savoy, should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hotbeds, or in seed-beds in May; transplant and cultivate like the cabbage.

BROCCOLI.

German, *Spragel-Kohl*; French, *Chou Brocoli*; Spanish, *Broculi*.

	Per oz.	Qr. lb.	Per lb.
Early White , heads medium size, compact, creamy white color, most certain to head	\$0 30	\$0 85	\$3 00
Purple Cape , differing from the preceding color, greenish purple	40	1 25	4 00
Walcheren , a valuable variety, with very large, firm heads	40	1 25	4 00
Mammoth White	40	1 25	4 00

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seed should be sown in this district in the early part of May, and transplanted in June, farther south the sowing should be delayed until June or July and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, Broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

CABBAGE.

German, *Kopfkohl*; French, *Chou*; Spanish, *Berza de reppollo*.

	Per oz.	Qr. lb.	Per lb.
Flat Persian , New Early Spring	\$0 25	\$0 85	\$3 00
Etampes , early French variety, with pointed heads	25	75	2 50
Express , very early; small solid heads	20	60	2 00
All Seasons , fine variety for second early or late growing; good size	20	60	2 00
Early Jersey Wakefield , the leading variety for market in the vicinity of New York; very early, of medium size, good quality, sure to head	25	75	2 50

All Seasons Cabbage.

Early Flat Dutch . This is one of the best early cabbages in cultivation, producing large, compact heads, from 10 to 12 pounds and upward in weight, and of excellent quality	25	75	2 50
Early Summer , a valuable early sort, resembling the Early Flat Dutch	25	75	2 50
Early Winnigstadt , heads large; one of the best for general use	15	50	1 50
Large York , larger and later than the Early York	15	50	1 50
Fottler's Improved Brunswick . This is a very fine second early variety	20	50	1 50
Henderson's Succession , a good second early and late variety, a sure header; seeds sown in March produce large heads in June	25	75	2 50

CABBAGE—Continued.

	Per oz.	Qr. lb.	Per lb.
Large Late Drumhead , an excellent fall and winter variety, grows to a large size, with round, compact heads	\$0 20	\$0 60	\$2 00
Large Late Flat Dutch , the most popular variety for late cultivation. Large solid heads, broad and flat on top, best to keep	20	60	2 00
Vandagaw's Flat Dutch , a sure header, quick growing	20	50	2 00
Red Stone Head , used almost exclusively for pickling	30	85	3 00
Drumhead Savoy (American), the largest heading sort, of excellent flavor	25	75	2 25
Filder Kraut, or Pomeranian Pointed Head	20	50	1 50

For very early use plant in the autumn, from 10th to 25th September, in a seed-bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring as soon as the soil will admit. For autumn and winter use, plant in the seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in 10 days. Sow in heat early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT.

German, *Moehren*; French, *Carotte*; Spanish, *Zanahoria*.

	Per oz.	Qr. lb.	Per lb.
Early French Forcing , the earliest variety, valuable for forcing; root small and of fine flavor	\$0 15	\$0 40	\$1 25
Early Round Parisian , small, for frames or open ground	15	30	1 00
Early Scarlet Horn , an old and favorite sort, much esteemed for early summer	10	25	85
Half Long Danvers , a variety intermediate in size and period of maturity between the preceding and the Long Orange	10	25	90
Half Long Stump-Rooted Chantenay , like Nantes, broader shoulder	10	30	90
Half Long Pointed	10	25	85
Half Long Stump Guarande	10	30	1 00
Half Long Stump Nantes	15	25	80
Carentan , a new early variety without core. It is an excellent sort for forcing, or used as an early kind for planting in the open ground	10	25	80
Long Orange Improved , roots of large size, equally adapted for garden or farm culture	10	25	80
Large White Belgian , grown almost exclusively for stock	10	25	80

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground, as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop, such as Celery, Potatoes, Onions or Peas, but avoiding such crops as Cabbage and Turnips, or any of the tap-rooted section. For early or main crops sow the latter part of April; for later crops they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Nantes Carrot.

	Per pkt.	Per oz.	Qr. lb.	Per lb.
Extra Early Dwarf Erfurt , short stem; fine	\$0 50	\$6 00		
Extra Early Paris . This is one of the earliest and best varieties; heads large white and compact, of fine quality	10	75	\$2 00	\$7 50
Early Snowball , admirable for forcing, very solid, pure white heads	25	2 25		
Large Early Dwarf Erfurt , the earliest and best of all varieties for forcing	05	2 25		

CAULIFLOWER.

German, *Blumen-Kohl*; French, *Chou-fleur*; Spanish, *Coliflor*.

CAULIFLOWER—Continued.

Snowball Cauliflower.

Lenormand's Short Stemmed, a late variety, producing very large, well-formed heads of su- perior quality, 10 cts. per pkt.,	Per oz.	¼ lb.	Per lb.
Algiers, popular late variety, sure to head, excellent for mar- ket, 10 cts. per pkt.	\$0 75	\$2 00	\$7 50
Early London. 10 cts. per pkt.	40	1 25	4 00

Cauliflower delights in a rich, moist soil, and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seeds in the hotbed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hotbed, until such time as they are safe to be planted in the open ground, which, in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY.

German, *Seleri*; French, *Celeri*; Spanish, *Apio*.

	Per pkt.	Per oz.	¼ lb.	Per lb.
Thorburn's Fin de Siecle (see Novelties)		\$0 30	\$0 85	\$3 00
Rose Ribbed Self-Blanching , a sprout of Golden Self-Blanching; very choice . . .	\$0 10	35	1 00	3 50
Evans' New Triumph , solid and crisp, fine nutty color		20	50	1 50
Giant Pascal , stalks very large, thick and crisp		20	50	1 50
Golden Self-Blanching , similar to White Plume, much larger in growth	10	40	1 25	4 00
Large Ribbed Kalamazoo , half dwarf white, solid		20	50	1 50
White Plume , requires very little banking		25	75	2 50
Pink Plume , similar to White Plume, stalks tinged with pink; good keeper	10	25	75	2 50
Golden Heart , one of the best for market or private use		20	50	1 75
Sandringham Dwarf White , an imported variety of fine flavor; soup greens		20	30	1 00
Boston Market , an excellent dwarf-growing white variety		20	50	1 50
Crawford's Half Dwarf , excellent for market or private use		20	50	1 50
Perfection Heartwell . It is very large and solid, half-dwarf, and full Golden Heart; good market garden variety		25	75	2 50
Covent Garden Rose , pink variety, good flavor.		25	75	2 50
Celery Seed, for flavoring (old seed)		05	10	25

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting, June and July; the tops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart, and pressing the soil firmly about the roots; keep free from weeds until the plants are able to take care of themselves. Earth up gradually during their growth, keeping the leaf stalks close together, so that the soil does not get between them. The soil best suited for Celery is a rich, moist loam.

CELERICAC or TURNIP-ROOTED CELERY.

German, *Knob-Seleri*; French, *Celeri-Rave*.

Prague; or Turnip-Rooted.	Per oz.	¼ lb.	1 lb.
Apple Celericac. An improved variety nearly round	\$0 15	\$0 50	\$1 50
	20	60	2 00

CHICORY.

German, *Chicorie*; French, *Chicoree Saur*; Spanish, *Escarola*.

Common. This variety produces the "*Barbe de Capucin*," a salad much used in France. Sown in June, the roots are transplanted in autumn into sand in a cellar; the shoots which will come up soon form the "*Barbe de Capucin*."

Per oz., 10 cts.; ¼ lb., 30 cts.; lb., \$1.00.

Large Rooted. Used to mix with or a substitute for coffee. Cultivation same as the Carrot.

Per oz., 10 cts.; ¼ lb., 30 cts.; lb., \$1.00.

CHERVIL.

German, *Binsenlauch*; French, *Cerfeuil*; Spanish, *Cerafolio*.

	Per oz.	¼ lb.	Per lb.
Curled	\$0 10	\$0 30	\$1 00
Common, or Tuberous Rooted	15	50	1 50

A variety of Celery having turnip-shaped roots, which may be cooked and sliced, and used with vinegar, making a most excellent salad. It is more hardy, and may be treated in the same manner as Celery.

Celeriac.

Chicory.

The young leaves are used in soups and salads. Sow thinly in May, in drills half inch deep, one foot apart.

COLLARDS—Georgia Grown.

German, *Blatter-Kohl*; French, *Chou-Cabu*; Spanish, *Cabu*.

Sow Seeds as for Cabbage in June, July and August, for succession. Transplant when one month old in rows a foot apart each way, and hoe often

Per oz.	¼ lb.	Per lb.
\$0 10	\$0 25	\$0 75

CORN SALAD, or FETTICUS.

German, *Ackersalat*, *Lammersalat*; French, *Mache*; Spanish, *Macha Valereanilla*.

	Per oz.	¼ lb.	Per lb.
Large Seeded	\$0 10	\$0 20	\$0 50
Lettuce Leaved	15	25	75
Small Seeded	10	20	50

Corn Salad, Feticus, or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart, and is fit for use in six or eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in, and is wintered

Corn Salad.

over the same way as Spinach.

CORN—SWEET.

German, *Zucker Welschkorn*; French, *Maise de Sucre*; Spanish, *Maiz de Azucar*.

Perry's Hybrid , very early and of large size; extra early	04	25	75	4 00
Crosby's Early Sugar , early sorts; ears short, from 12 to 16 rows; second early.	04	25	75	4 00
Early Marblehead , very early; ears good size, extra early	04	25	75	4 00

CORN—SWEET—Continued.

	Per ear.	Per qt.	½ pk.	Per bush.
Moore's Early Concord , ears large and well filled, from 12 to 20 rows; second early	\$0 04	\$0 25	\$0 75	\$4 00
Early Adams , not a Sugar Corn; second early	04	25	75	4 50
Early Mammoth , large and not very late; general crop	04	25	75	4 50
Egyptian, or Washington Market , new, one of the best of the large sorts, ears from 12 to 15 rows; a superior quality for canning; late	04	25	75	4 00
Triumph , excellent medium early, large size, rich, sweet; good for market; general crop	04	25	75	4 00
Hickox Improved , a new variety of superior excellence, ears 12-rowed, straight and handsome; a superior market kind; general crop	04	25	75	4 00
Stowell's Evergreen , a late variety of excellent quality, remaining longer in the green state than any other; general crop	04	25	75	4 00
Asylum , late variety, 12-rowed, very sweet and delicious; general crop	04	25	75	4 00
Mammoth Sugar , late variety; one of the largest; productive; late	04	25	75	4 50
Black Sugar , black ears, said to be the sweetest of all kinds; late	04	25	75	4 50
Moonachie , very sweet; well-filled ears and productive; general crop	04	25	75	4 50
Sweet Fodder , for ensilage				2 75

Sweet Corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in the rows, or planted in the hills, at distances of three or four feet each way, according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distance apart. The first plantings in this vicinity are made about the middle of May, and successive plantings every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

Sweet Corn.

FIELD CORN.

	Qt. shelled.	Per 100 ears.	Bush. shelled.
Mastodon Dent , very early, strong growing	\$0 15	\$2 00	\$1 60

CRESS.

German, *Kresse*; French, *Cresson*; Spanish, *Mastuerzo*.

	Per oz.	Qr. lb.	Per lb.
Curled Cress or Peppergrass	\$0 10	\$0 20	\$0 40
Water Cress	35	1 00	3 50

Are excellent for small salads; the leaves while young have a warm, pungent taste. They can be used alone or mixed with Lettuce, Mustard or other salad plants. Sow thickly at frequent intervals for succession, and treat in the same manner as Mustard.

CUCUMBER.

German, *Gurken*; French, *Concombre*; Spanish, *Pepino*.

	Per oz.	Qr. lb.	Per lb.
Cumberland	\$0 25	\$0 75	\$2 50
Livingston's Emerald , round and smooth, small seed portion	25	75	2 25
Fordhook Pickling , prolific, medium size, skin thin	25	75	2 25
Cool and Crisp , very prolific; good for pickling and slicing	25	75	2 50
Thornburn's Everbearing , small size; very early and productive	20	60	2 00
Early Russian , the earliest variety, small and short	20	60	2 00
Nichols' Medium Green , straight and smooth, medium in size; good for early forcing	20	60	2 00
Improved Early White Spine , the best table variety; grows uniformly straight and smooth; dark green; tender and excellent flavored	20	60	2 00
Peerless White Spine , a new variety of the preceding; average length, 10 inches; full at both ends; deep green, holding color until mature	20	60	2 00
Boston Pickling , largely used for forcing by the market gardeners in the vicinity of Boston. It is productive and of superior quality	20	60	2 00
Tailby's Hybrid , a cross between the Early White Spine and an English Frame variety, combining the hardiness of the first with the beauty and size of the latter	20	60	2 00
Early Green Cluster , a short, prickly, seedy variety, bearing in clusters near the root. It is a great bearer	20	60	2 00
Early Short Green , the standard for pickling, medium size, straight and handsome. It makes a beautiful pickle that keeps well	20	60	2 00
Long Green , a very excellent variety; a good bearer, about a foot in length, rather pointed at both ends; dark green, firm and crisp	25	75	2 50
Green Prolific , very prolific, and said by those who have tested it to be the best pickling Cucumber on the market; it is equally desirable as a market Cucumber	20	60	2 25
White Japan , pure white, smooth	20	60	2 00
White Pearl , very long; good table variety	15	60	1 85
West Indian Gherke nor Burr , a very small, oval-shaped prickly variety. It is grown exclusively for pickling, and should always be pickled when young and tender	25	75	2 50

Cucumbers.

Cucumbers succeed best in warm, moist, rich, loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. The fruit should be plucked when large enough, whether required for use or not, as if left to ripen on the vines, it destroys their productiveness.

English Frame Cucumber—Per pkt., 25 cts.
Improved Slon House. Telegraph. Giant of Arnstadt. Duke of Edinburgh. Gen. Grant. Long Gun. Carter's Tender and True. Swan Neck. Blue Gown.

These varieties are for growing in hotbeds, or in houses particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in November, December

or January, according to the time they are wanted for market, taking care to give plenty of air and water. It will be necessary to fertilize the pistillate flowers with the staminate in order to render the vines productive, as owing to the absence of insects they will not produce a crop under glass the same as in the ground, where bees and other insects have free access to the flowers.

Dandelion.

DANDELION.

German, *Pardeblume*; French, *Pisse-en-lit*; Spanish, *Armargon*.

	Per oz.	Qr. lb.	Per lb.
Thick Leaved	\$0 45	\$1 25	\$4 50
Best French	20	60	2 25
Endive Leaved, new	50	1 75	6 00

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

ENDIVE.

German, *Endevien*; French, *Chicoree*; Spanish, *Endivia*.

	Per oz.	Qr. lb.	Per lb.
Green Curled Winter , very hardy; leaves dark green, tender and crisp	\$0 15	\$0 50	\$1 50
Broad-Leaved Batavian (<i>Escarolle</i>), chiefly used in soups and stews; requires to be tied up for blanching	15	50	1 50
Early White Curled (<i>Self-Blanching</i>), the best variety, grows to a large size; very large and tender	15	50	1 50
Moss Curled Early Summer , used for salads same as winter varieties	15	60	2 00

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no especial soil or manure, and after planting is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is effective by gathering up the leaves and tying them by their tips in a conical form with bass matting. This excludes the light and air from the inner leaves, which in the course of three to six weeks, according to the temperature at the time, become blanched. Another and simpler method consists in covering up the plants as they grow, with slats or boards, which serves the same purpose by excluding the light as the tying up.

Green Curled Endive

EGG PLANT.

German, *Eierpflanze*; French, *Aupegine*; Spanish, *Berengena*.

Pearl White Egg Plant

	Per oz.	Qr. lb.	Per lb.
Pearl White , very fine grain and well flavored . . . per pkt. 10c.	\$0 35	\$1 00	\$3 50
New York Improved , a superior market variety of large size and fine quality	35	1 00	3 50
Early Long Purple , early, of easy culture, hardy, productive; excellent for table	20	60	2 00
Early Dwarf Purple , medium size	25	75	2 50
Black Pekin , a fine variety, bearing large round, deep purple fruits, fine grained and of superior quality	25	75	2 50

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hotbeds, or if these are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or boxes in the house. Plant out early in June from two to three feet apart.

KALE.

German, *Blatter-Kohl*; French, *Chou Vert*; Spanish, *Breton*.

Siberian, German Greens or "Sprouts." This variety is extensively used for early greens, for which it is sown in the fall, in rows one foot apart, and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring	Per oz.	Qr. lb.	Per lb.
	\$0 10	\$0 20	\$0 60
Dwarf Green Curled Scotch , a beautifully fringed, dwarf-growing kind, with bright green leaves	10	30	90
Tall Green Curled Scotch , tall growing, very hardy variety, leaves a bright green, beautifully curled	10	30	90
Tall Brown German Curled , a very hardy and useful variety	15	50	1 75
Dwarf Brown German Curled	10	40	1 00

Scotch Kale

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in spring, in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for Cabbage. Of all the Cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

SEA-KALE.

German, *Seekohl*, *Meerkohl*; French, *Crambe Maritime*; Spanish, *Breton de Mar*.

Sea-Kale Seeds , very much like Celery	Per oz.	Qr. lb.	Per lb.
	\$0 25	\$0 75	\$2 50

Cultivated for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in a warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

KOHL-RABI.

German, *Kohl-Rabi*; French, *Chou Rave*; Spanish, *Colinabo*.

Early Vienna
Kohl-Rabi

Early White Vienna , flesh white and tender; best market sort; good for table use	Per oz.	Qr. lb.	Per lb.
	\$0 25	\$0 75	\$2 50
Early Purple Vienna , differing from the above in color, which is of a bluish purple	30	85	3 00

Kohl-Rabi, or Turnip-stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb somewhat resembling a Turnip; this again is crowned with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as Cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

LEEK.

German, *Lauch*; French, *Poireau*; Spanish, *Puerro*.

Large American Flag , the kind mostly grown for market	Per oz.	Qr. lb.	Per lb.
	\$0 20	\$0 50	\$1 50
Large Carentan , a large-growing French variety of excellent quality	20	60	1 75
Large Rouen , very large and fine	20	50	1 50

Flag Leek

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched. If fine Leeks are desired, the ground can hardly be made too rich.

LETTUCE.

German, *Laitich-Sala*; French, *Laitue*; Spanish, *Lechuga*.

Maximum Lettuce.

	Per oz.	Qr. lb.	Per lb.
Nansen . . Pkt., 10c.	\$0 40		
Thorburn's Maximum . Large and solid; heat resisting	15	\$0 35	\$1 25
Thorburn Market Garden , private stock; solid large head	20	50	1 50
Selected Buttercup , yellow, solid heads, for outdoor forcing .	20	50	1 50
Big Boston , similar to Boston Market, double this size . .	20	50	1 50
Grand Rapids Forcing , large, tender heads	15	40	1 25
Early Curled Simpson , very early and an excellent sort for forcing; is largely grown by the market gardeners . . .	10	30	1 00
California , all heart, new variety, solid head, light green color	15	30	1 00
Denver Market , for forcing or open ground; large solid heads	15	30	1 00
Tennis Ball , (black seeded), well-formed heads, hardy and crisp; one of the earliest of the heading varieties	15	30	1 00
Tennis Ball or Boston (white seeded), grows very compact, white and crisp; one of the best for forcing or the open ground	15	30	1 00
Salamander Head , fine, compact head, resists heat	20	50	1 50
Golden Stone Head , small and solid	20	50	1 50
Black-Seeded Butter , fine market strain	20	50	1 50
Large White Cabbage , excellent for summer; heads of good size	15	40	1 25
Black-Seeded Simpson , stands the summer well	15	30	1 00
Gray-Seeded Butter , one of the best large heads	15	30	1 00
Shotwell's Brown Head , large and handsome	30	85	3 00
Trianon Cos , the best of the Cos variety	20	50	1 50
American Gathering , a distinct and valuable variety of excellent quality	15	30	1 00
White Cos Romaine . Sow early; tie up to blanch	20	50	1 50

Lettuce is the most popular of all salads. Boiled, it is quite equal to Spinach, and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March, and transplant as soon as the ground can be worked. Later, sowing may be made in the open ground for succession as long as the weather permits; thin out well, or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MARTYNIA.

A strong-growing annual plant, bearing curiously shaped seed pods, which when young and tender make excellent pickles. Sow in the open ground in May, and thin out the plants to two or three feet apart, or a few seeds may be sown in a hotbed and afterwards transplanted. Per oz., 25c.; qr. lb., 75c.; lb., \$2.50.

MELON MUSK.

German, *Melone*; French, *Melon*; Spanish, *Melon Muscatel*.

	Per oz.	Qr. lb.	Per lb.
Paul Rose . Handsome, oval, orange flesh, sweet	\$ 10	\$0 20	\$0 60
Livingston's Tip Top . Very sweet	10	20	60
Long Island Beauty , similar to Hackensack; very early	15	30	80
Winter Pineapple , flesh light green color, flavor of pineapple, does not ripen on the vine.	15	40	1 25
The Banquet , color of flesh dark, rich salmon	10	25	70
(5) Miller's Cream, or Osage , flesh a salmon color and very thick	10	20	60
Golden Netted Gem , early, small, fine flavor	10	20	60
(3) Hackensack , variety of Green Citron, well known among the New York market gardeners, grows to a very large size, productive, exquisite flavor	10	20	60
Montreal Market , green flesh, very thick; fine flavor	10	20	60

MUSKMELON—Continued.

Baltimore Market, oblong; orange flesh. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

(4) **Delmonico**, oval, deeply netted; orange flesh. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

Chicago Nutmeg, large, fine grade. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

Orange Christina, very clear, excellent sort; green, with yellow flesh. Per oz., 15 cts.; qr. lb., 20 cts., per lb., 60 cts.

Bay View, a new green-flesh variety of large size and superior quality. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

Surprise, a very fine new variety; flesh salmon colored and of exquisite flavor. Per oz., 10 cts.; qr. lb., 20 cts.; per lb., 60 cts.

Muskmelons.

	Per oz.	Qr. lb.	Per lb.
(1) Jenny Lind , a very early kind, of small size, but delicious flavor	\$0 10	\$0 20	\$0 50
White Japan , size medium and nearly round; skin cream-white and very thin; flesh pale green; early and sweet	10	20	60
(2) Long Yellow Cantaloupe , yellow flesh; suitable for the work	10	20	60
Pomegranate , for perfume. Not edible	15	40	1 25
Nutmeg , fruit nutmeg shape; skin deep green, finely netted; flesh greenish yellow, rich and sugary	10	20	50

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill early in May, and when well up, thin out to three or four of the most promising. Pinch off the leading shoots as the growth become too luxuriant, and if the fruit sets too numerously, thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

Paul Rose Melon.

MELON, WATER.

German, *Wassermelone*; French, *Melon d'Eau*; Spanish, *Zandia*.

	Per oz.	Qr. lb.	Per lb.
Ruby Gold , flesh yellow and red	\$0 10	\$0 25	\$0 75
Kolb's Gem , nearly round, dark green	10	20	50
Seminole , a new early variety. Long striped sort	10	20	50
Pride of Georgia , dark green, oval in shape; crisp and sweet; very large	10	20	50
Scaly Bark , thin rind; flesh light crimson	10	20	50
Mountain Sweet , one of the very best for general culture; color dark green; rind thin; flesh scarlet, solid, very sweet and delicious	10	20	50
Black Spanish , shape round, rather small; skin dark green; flesh red, sweet and rich	10	20	50
Phinney's Early , flesh deep red, of a very superior quality; a valuable early market variety	10	20	60
Cuban Queen , solid and heavy	10	20	50

MELON, WATER—Continued.

	Per oz.	Qr. lb.	Per lb.
Ice Cream (<i>white seeded</i>), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid, crisp, excellent	\$0 10	\$0 30	\$0 50
Rattlesnake , very large, striped, red flesh variety	10	20	50
Citron , round, handsome fruit of small size, and used in the making of sweetmeats and preserves	10	20	60
Volga , pale green; red flesh	10	25	75
Mammoth Iron-Clad , long and large; thin skin; deep red flesh	10	20	60
The "Boss," oblong; dark green	10	20	60

Plant in hills as directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSTARD.

German, *Senf*; French, *Moutarde*; Spanish, *Mostaza*.

	Per oz.	Qr. lb.	Per lb.
White London , best for salads	\$0 05	\$0 10	\$0 25
Black , used for cooking and for salads	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowings of it, as it should be cut and used in a very young state, even before the first rough leaf has appeared. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade, and should then be watered through the fine rose of a watering pot, without having any soil placed upon it; but the bed should be covered for a few days with a piece of cloth or mat, and in the course of six or eight days the Mustard will be fit for use, and should be cut close to the surface of the soil with a sharp knife; and no soil having been placed over the seeds, it will be found clean and free from grit.

MUSHROOMS.

German, *Champignonbrut*; French, *Champignon*; Spanish, *Hongo*.

Virgin Spawn , in tablets, new	10 cts. a tablet
Imported English Spawn	15c. per lb.; 10 lbs., \$1.00; 100 lbs., \$9.00
Imported French Spawn	3-lb. box, \$1.20

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where a temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of the dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet.

The most convenient size for a bed is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn, two or three inches in diameter; fill up the holes with the compost and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately, and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

Mushrooms.

NASTURTIUM.

German, *Nasturtium*; French, *Capucine*; Spanish, *Maranucla*.

	Per oz.	Qr. lb.	Per lb.
Tall Scarlet	\$0 15	\$0 30	\$0 75
Tall Yellow	15	30	75
Tall Nasturtium, Mixed	10	25	75
Dwarf Nasturtium, Mixed	10	30	1 00

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its beautiful scarlet and orange-color flowers, which bloom freely all summer, add a charm to the garden.

ONION.

German, *Zweibel* ; French, *Oignon* ; Spanish, *Cebolla*.

Yellow Globe Danvers Onion.

	Per oz.	Qr. lb.	Per lb.
Australian Brown , earlier than the red Wethersfield; a good keeper	\$0 15	\$0 30	\$0 90
Early Red , flat; about ten days earlier than the Large Red, and not quite so large	15	40	1 10
Large Red Wethersfield , the staple variety of the Eastern onion growers; of large size, deep in color, and a good keeper	15	35	1 10
Yellow Globe Danvers , an excellent variety; mild flavored and very productive; ripens early and a good keeper	15	35	1 00
White Portugal, or Silver Skin , a handsome onion of mild flavor; extensively grown for pickling	25	75	2 25
Griswold's Medium Early Red Globe , about two weeks earlier than Southport Red Globe	15	40	1 20
Southport Red Globe , similar to the Large Red in color and flavor, but quite distinct in form, being nearly globular.	15	50	1 40
Southport White Globe , form nearly ovoid, very symmetrical, keeps well, is an excellent variety	25	75	2 25
Southport Yellow Globe , same as the above, except in color	15	50	1 25
White Flat Bermuda . Very early	30	85	3 00
Red Flat Bermuda . Very early.	30	85	3 00

Italian Varieties.

Adriatic Barletta , white, new variety, fully two weeks earlier than the Queen	30	85	2 75
Early Queen , an excellent variety, very early, a good keeper and mild flavored	30	85	2 50
Giant Rocca , a splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor.	20	50	1 50

The Onion thrives best in a rather strong, deep, rich, loamy soil, and, unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread it firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequent hoeing, taking care not to stir the soil too deeply nor to collect it about the growing bulbs.

Barletta Onion.

ONION SETS.

Potato Onion Sets.

	Per qt.	½ pk.	Per pk.
White Onion Sets	\$0 25	\$0 75	\$1 25
Yellow Onion Sets	20	60	1 00
Red Onion Sets	20	60	1 00
Potato Onions	25	75	1 25
Shallots	25	75	1 25
Red Top Onions	20	60	1 00

OKRA, or GUMBO.

German, *Essbarer Safran*; French, *Gombo*; Spanish, *Quibombo*.

	Per oz.	¼ lb.	Per lb.
Improved Dwarf White , long slender pods, very productive and only 14 inches high	\$0 10	\$0 20	\$0 50
Dwarf Green , early and productive	10	20	50
Long Green , fine long pods, very good	10	20	50

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is of the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

Dwarf Green Okra.

PARSLEY.

German, *Petersilie*; French, *Persil*; Spanish, *Perjil*.

	Per oz.	¼ lb.	Per lb.
Extra Double Curled , a fine dwarf variety, excellent for garnishing	\$0 10	\$0 25	\$0 70
Fern Leaved , the most beautiful form of Parsley, resembling crested fern or moss in its growth	10	25	75
Plain , leaves plain, hardier than the curled variety	10	20	50
Hamburg, or Rooted ; the roots are for flavoring soups, etc.	10	20	60
Moss Curled	10	25	70

Should be sown very early in spring, in beds or in lines, and the seeds, which are somewhat slow to vegetate, should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance to the seeds when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

PARSNIP.

German, *Pastinake*; French, *Panais*; Spanish, *Chirivía*.

	Per oz.	¼ lb.	Per lb.
Guernsey or Cup , leading variety	\$0 10	\$0 20	\$0 50
Long Smooth, or Hollow Crown , long roots	10	20	50
Long White , standard variety	10	20	50

Moss Curled Parsley.

PARSNIPS—Continued.

Parsnips are largely used both as a garden vegetable and for the farm. They are very nutritious, and cattle fed upon them fatten rapidly; while in cows they produce a larger yield of milk, having a rich color and affording butter of excellent quality. They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, and thin the plants to six inches in the drill.

PEAS.

German, *Erbse*; French, *Pois*; Spanish, *Guisantes*.

Extra Early Varieties.

	Per Qt.	½ pk.	Per bu.
Gradus , earliest large-podded Pea in cultivation, height 2½ feet	\$0 50	\$1 75	\$12 00
Allan's Sunol , very early and productive, height 2½ feet	30	1 00	6 00
Nott's Excelsior , extra early dwarf wrinkled, pods larger than American Wonder, 1 foot	35	1 25	7 50
American Wonder , earliest wrinkled variety, 2½ ft.	35	1 25	7 50
Alaska , very early and retain their color well	30	85	5 00
Earliest of All , earliest Blue Marrow now offered	30	85	5 50
First and Best , a very fine early variety, 3 feet	25	75	5 50
Rural New Yorker , height, 2½ feet, pods fine shape, well filled, six to nine peas in a pod	25	75	5 50
Improved Daniel O'Rourke , a favorite early variety, 2½ feet	30	85	5 00
Philadelphia , resembling First and Best, 3 ft.	25	75	5 50
Little Gem , a dwarf green wrinkled Marrow, very prolific, of superior flavor, and a first early. 1 foot	35	1 25	7 50
Premium Gem , very early, well filled pods, one foot high	30	1 00	7 50
Alpha , extra early blue wrinkled Marrow Pea of fine quality, and very prolific, pods large and well filled, 3 feet	30	1 00	6 00
Blue Peter , an excellent dwarf and a very early variety, 1½ feet	30	85	5 00

Second Early Varieties.

Heroine Medium Early , green wrinkled	30	85	5 50
Everbearing , good-size pea, long pod	30	85	5 00
McLean's Advancer , early green wrinkled varieties, delicious flavor, 2 feet	Per qt. \$0 30	½ pk. \$0 85	Per bu. \$5 00
Prince of Wales Heavy Cropper , fine flavor	25	75	4 50
Pride of the Market , very large pod, green peas, sow thin	30	85	6 50
Yorkshire Hero or Dwarf Champion , 2½ feet	30	85	5 25
Abundance , 18 inches high, 6 to 8 peas in pod, large and wrinkled	30	85	5 00

General Crop.

Champion of England , one of the best and most popular Peas, 5 feet	25	75	4 25
Paragon , large producer, double podded	30	85	5 00
No Plus Ultra , a popular wrinkled variety	25	75	4 50
Dwarf Sugar , edible pods, 2 feet	30	1 00	6 00
Tall Sugar , edible pods, a fine flavored variety, can be used in the green state like string beans	35	1 25	7 00
Flam Grey Sugar , edible pods	35	1 25	7 00
Carter's Telephone	30	1 00	6 00
Black-Eyed Marrowfat , grown for market, hardy, productive, 4 feet	20	60	3 25
White Marrowfat , an old and favorite sort for market, 4 feet	20	60	3 50
Telegraph , large pods and peas	25	85	5 50
Carter's Stratagem , mammoth pods, well filled	30	1 00	6 00
St. Disirat , melting sugar; edible pod; New. Pkg., 10c.; pt., 40c.; qt., 75c.			

Allan's Sunol.

PEAS—Continued.

Peas come earlier to maturity in light rich soil. For general crop a deep rich loam, or strong loam, inclining to clay, is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crops a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, Peas are not staked, but sown in single rows, two or three inches deep, two to three feet apart, according to the variety. When grown in small quantities, for private use, they are generally sown in double rows six or eight inches apart and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

Peppers.

- Long Yellow Cayenne**, similar to Long Red, except in color 30 80 3 00
 - Cardinal**, mild, thick fleshed, new 25 75 2 50
 - Chili**, very piquant and prolific; fruit conical; bright scarlet 25 75 2 50
 - Cherry Red**, very ornamental variety; a rich glossy scarlet; piquant 30 85 3 00
 - Cranberry**, one of the best for pickles 25 75 2 50
 - Oxheart**, heart shaped, very fine, excellent for pickling 35 1 25 4 00
 - Golden Dawn Mango**. This is a remarkably prolific Pepper of the Bell class, and of a magnificent golden color 25 75 2 50
 - Giant Emperor**. This sort bears scarlet fruit six inches long and a quarter of an inch thick 25 75 2 50
- The pepper or capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled; or sow in warm situation in the garden about middle of May. Plants should be set a foot and a half apart.

PEPPER.

German, *Pfeffer*; French, *Piment*; Spanish, *Pimiento*.

	Per oz.	Qr. lb.	Per lb.
Ruby King , very large and bright red	\$0 25	\$0 75	\$2 50
Sweet Spanish , one of the largest, mild and pleasant, best for salads	25	75	2 50
Large Bell, or Bull Nose , an early variety of mild flavor	20	60	2 00
Sweet Mountain, or Mammoth , of large size, best for mangoes	25	75	2 50
Squash, or Tomato Shaped , very productive, the leading market variety	25	75	2 25
Long Red Cayenne , used for pepper sauces; very pungent	25	75	2 50

POTATO.

German, *Kartoffel*; French, *Pomme de Terre*; Spanish, *Patata*.

Houlton Rose and Hebron Potatoes—Planted in Rows.

	Per Bu.	Per bbl
Pride of Ireland . Late variety, good keeper, skin white, introduced last season	\$2 00	\$4 00
Seneca Beauty . Long potato, very smooth	2 00	4 00

POTATO—Continued.

- Houlton Bliss Triumph**, red skin, very early and productive
- Houlton Hebron**, white skin, the most popular variety in cultivation
- Houlton Rose**. The Standard Variety. Our specialties
- Houlton Pearl of Savoy**, very early, cross between Clark No. 1 and early Vermont
- Houlton Early Queen**,
- Houlton Green Mountain**, late variety, good keeper, white and mealy

Prices on application.

The foregoing varieties are grown for us at Houlton, Aroostook Co., Me., are the choicest stock ever offered. Coming from the extreme northern part of Maine, and raised without the aid of manure, causes them to have very strong eyes and to be hardy and very smooth. Productiveness unsurpassed. The following are raised for us in Washington County, northern New York:

	Per bu.	Per bbl.
Thorburn , very early, very productive	\$2 50	\$4 50
Rural New Yorker , No. 2	2 00	4 50
Early Ohio , a seedling of the Early Rose, ripening a week earlier	2 50	4 50
Early Maine	2 00	4 00

PUMPKIN.

German, *Kuerbis*; French, *Courge*; Spanish, *Calabaza Totanera*.

	Per oz.	Qr lb.	Per lb.
Calhoun , flesh wonderfully thick and fine grained, cooks very yellow	\$0 10	\$0 25	\$0 75
Large Cheese , the best variety, hardy and productive	10	20	50
Connecticut Field , very productive, largely grown for feeding stock. 15c. per qt.; per bush., \$3 00.			
Mammoth King , grows to an immense size	20	60	2 00
Sugar Pumpkin	10	20	50
Cushaw , salmon color, crooked neck	10	25	70
Mammoth Tours , very large	10	25	75

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May, in hills eight feet apart.

RADISH.

German, *Retting*; French, *Radis*; Spanish, *Robanitos*.

	Per oz.	Qr lb.	Per lb.
Livingston's New Pearl Forcing , waxy pearl-white in color, 5c. pkt.	\$0 15		
Beckert's Chartier , shades from crimson to white	10	\$0 25	\$0 75
Early Scarlet Turnip , the standard variety; of quick growth, mild and crisp when young	10	20	60
Early Scarlet Turnip Forcing Variety , maturing in three weeks	10	20	60
Early Scarlet Turnip, White Tipped , a beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners	10	20	60

Wick's Early Scarlet Globe

RADISH—Continued.

	Per oz.	Qr. lb.	Per lb.
Early Scarlet Turnip , white tip, forcing	\$0 10	\$0 0	\$0 60
Olive Shape Deep Scarlet	10	20	60
French Breakfast , of quick growth, very mild and tender, of oval form, color scarlet, tipped with white	10	20	60
Long Scarlet , one of the leading market kinds	10	20	60
White Turnip , a Summer variety of mild flavor	10	20	60
Yellow Summer Turnip , grows to a large size	10	20	60

Scarlet White Tip Radish.

Rose China Winter , flesh firm and piquant; excellent for Winter use	10	20	60
Black Spanish Winter , long, one of the hardiest and best for Winter use	10	20	60
Black Spanish Winter , round	10	20	60
Giant Stuttgart , Summer favorite, German sort	10	20	60
California Mammoth White , a giant white-fleshed Fall Radish	10	20	60
Long White Naples , flesh white, crisp, and mild	10	20	60
White Spanish , long, rather milder than Black	10	20	60
White Strasburg , very large, German sort.	10	20	60

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and those for Winter use, which are large and mature slowly, and with proper care can be kept all Winter. The Summer Radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in a light, rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The Winter varieties may be sown from the latter part of July to the middle of September.

RHUBARB.

German, *Rabarber*; French, *Rhuberbe*; Spanish, *Ruibarbo*.

	Per oz.	Qr. lb.	Per lb.
Linnæus , early, large and tender	\$0 20	\$0 50	\$1 50
Victoria , very large, later than Linnæus	20	50	1 50
Roots	10 cts. each; \$1.00 per doz.		

Sow early in Spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In Fall or following Spring, transplant into deep, rich soil, about three feet apart each way.

SPINACH.

German, *Spinat*; French, *Spinard*; Spanish, *Espinaca*.

	Per oz.	Qr. lb.	Per lb.
Long Standing, Round Leaved	\$0 10	\$0 15	\$0 35
Flander's Round Leaved , the variety commonly grown, good for Spring or Fall sowing	10	15	35
Large Viroflay , a new variety, with leaves much larger and thicker than the old variety	10	15	35
Victoria New , dark green color; sow early	10	15	35
Savoy Leaved , a large, curled, thick leaved variety, the market gardener's favorite	10	15	35
Prickly , prickly seeded, with triangular arrow-shaped leaves	10	15	35
New Zealand , produces leaves in great abundance throughout the Summer; should be raised in heat and transplanted three feet apart each way into light rich soil	10	30	1 00

Sow in Fall for Spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For Summer use sow as early as possible in Spring, and at frequent intervals during the season for succession.

SALSIFY, or OYSTER PLANT.

German, *Bocksbart*; French, *Salsifs*; Spanish, *Salsifi*.

	Per oz.	Qr. lb.	Per lb.
Long White French	\$0 15	\$0 30	\$1 00
Mammoth Sandwich Island	15	40	1 25

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all Winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SCORZONERA—Black Oyster Plant.

German, *Schwarzwurzel*; French, *Scourge*; Spanish, *Escorzonera*.

This vegetable requires the same treatment as Salsify, which it nearly resembles.

Per oz., 30c.; Qr. lb., 85c.; Per lb., \$3.00

Salsify.

SQUASH.

German, *Garten Kuerbiss*; French, *Courge*; Spanish, *Calabaza Bonetera*.

	Per oz.	Qr. lb.	Per lb.
Faxon , medium size, orange flesh, and early	\$0 10	\$0 20	\$0 60
Mammoth Summer Crook Neck , twice size of Summer Crook Neck	10	20	60
Fordhook Squash , bright yellow, good keeper	10	25	75
The Sibley , solid, thick, brilliant orange in color	10	20	60
Early Golden Bush Scallop , early, excellent for shipping	10	20	60
Early White Bush Scalloped , a white variety of the above	10	20	60
Summer Crook Neck , early, productive, and of good quality	10	20	60
Canada Winter Crook Neck , flesh close grained, sweet and fine flavored	10	20	60
Green Striped Bush , white, with green stripes	10	25	75
Boston Marrow , a very valuable medium early variety, an excellent keeper and of superior quality	10	20	60
Hubbard , the best Winter Squash, fine grained, dry, keeps well, and is of excellent flavor	15	30	1 00
Pineapple , white skin and flavor	10	25	75
Marble Head , a superior Winter variety, large, productive, fine grained and sweet	10	25	75
Butman , a superior new Winter variety, very dry, fine grained and productive, excellent flavor, keeps well	10	25	75
Turban , flesh orange-yellow, excellent Fall Squash	15	30	1 00
Mammoth Chili , grows to a large size, often weighing two hundred pounds, excellent for stock	15	40	1 25
Vegetable Marrow , a favorite English sort, skin greenish yellow, flesh white, soft and of rich flavor	15	30	1 00

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hills for the seeds by incorporating two or three shovelfuls of well-rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

White Bush Squash.

TOBACCO.

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States.

Per oz., 25c.; Qr. lb., 50c.; Per lb., \$1.50

Havana, imported seed. *Vuelto de Abajo* Per oz., 40c.; Qr. lb., \$1.50; Per lb., \$4.00

Tobacco seed may be started in a hotbed, or sown in the open ground, as early in Spring as the ground can be worked. Prepare a bed in rich dry ground, with a southern exposure; the bed should be burned over to kill the seeds of weeds and wild grasses, or they will spring up before the Tobacco plants and destroy them. After this is done, rake it off fine and sow the seed. A tablespoonful is sufficient for one hundred square yards. Sow broadcast, and hand roll, or press down the soil evenly and firmly. When the young plants appear, keep free from weeds and water frequently. If the weather is dry, set out about the first of June, in land that has been heavily manured. Tobacco thrives best in a light, rich, sandy or gravelly soil. Plant about three feet apart. Look out for the "Tobacco worm," which must be removed as fast as it appears, or it will quickly destroy the crop.

TOMATO.

German, *Liebesapfel*; French, *Tomote*; Spanish, *Tomata*.

	Per oz.	Qr. lb.	Per lb.
Waldorf , perfect shape, medium early, very productive	\$0 30	\$1 00	\$3 00
Livingston's Honor Bright , solid, long keeping qualities	25	75	2 50
Imperial , very smooth, bright red color, good size	25	75	2 50
New Buckeye State , large size, similar to Livingston's Beauty, little darker in color.	30	85	3 00
Thorburn's Terra Cotta , a cross between the Stone Peach and Ponderosa	30	85	3 00
Fordhook , extra early, medium size	25	75	2 50
Thorburn's Lemon Blush , skin and flesh bright lemon color	30	85	3 00
Ponderosa , very large and solid, Per pkt., 10c.	50	1 50	5 00
New Stone , large and smooth	25	75	2 50
New Peach , resembling a Peach, for preserves	25	75	2 50
Ignotum , early, large and smooth	25	75	2 25
The Lorillard , a cross between Acme and Perfection	30	85	3 00
Mikado , very large, pale and distinct foliage	25	75	2 50
Livingston's Beauty , large, dark crimson, thick skin	30	85	3 00
Dwarf Champion , resembles Acme, early	40	1 25	4 00
Acme , a beautiful variety, fruit of medium size, form perfect and very smooth, ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a Tomato	25	75	2 50
Trophy (selected), the leading variety for general cultivation, and when properly grown will give satisfaction. The seed we offer is carefully selected from pure stock	25	75	2 50
Essex Hybrid , large, shining, very solid	25	75	2 50
Livingston's Perfection , early, very prolific, good flavor and solid	25	75	2 50
Livingston's Favorite , early, solid and fine color, prolific, fine for canning	20	60	2 00
Large Yellow , deeply ribbed	20	60	2 00
Yellow Plum , used principally for pickling	25	75	2 50
Red Pear Shaped , used for preserving and pickling	25	75	2 50
Red Currant , for preserves	30	85	3 00
Yellow Cherry , similar to the above except in color	25	75	2 50
Strawberry or Winter Cherry , excellent for preserving, will keep all winter	20	60	2 00

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart, in hills in which a good shovelful of rotted manure has been mixed. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

Red Top Strapleaf Turnip.

TURNIP.

German, *Rube*; French, *Navet*; Spanish, *Nabo*.

	Per oz.	Qr. lb.	Per lb.
	\$0 10	\$0 20	\$0 60
Milan (purple top), the earliest of all	10	20	50
Purple Top Munich , one of the earliest varieties	10	20	50
Early White Flat Dutch , an early garden variety of medium size	10	20	50
White Top Strap Leaf , quick in growth, of excellent quality	10	20	50
Red Top Strap Leaf . This and the preceding are the best two kinds for Spring sowing and for garden culture	10	20	50
Red Top White Globe , very desirable, extensively grown for market	10	20	50
White Egg , a new variety, beautiful shape, excellent table Turnip	10	20	60
Yellow Globe , one of the best for general crop, either for table use or stock	10	20	40
Yellow Stone , a good globe-shaped Turnip, similar to the above	10	20	60
Golden Ball , a table Turnip of quick growth and unsurpassed quality	10	20	50
Long White, or Cow Horn , one of the best field Turnips, flesh fine grained	10	20	60
Yellow Aberdeen , hardy and productive, largely grown for farm purposes	10	20	50
Large White Norfolk , globe-shaped variety, one of the best for stock	10	20	50
Pomeranian White Globe , very fine, white Globe variety, round and thick	10	20	50
German Teltow , small, early, fine grade, sugary	15	20	60

RUTA BAGAS.

American Improved Purple Top , the leading variety, of fine quality, valuable both for the table and for feeding stock	10	20	60
Carter's Imperial Hardy Swede , an English variety, highly recommended as producing enormous crop	10	20	60
Long White French , an excellent sort either for table or stock	10	20	60
White, or Sweet German , a large, solid variety	10	20	50
Shamrock , very large and solid, one of our choicest varieties	10	20	50
Laing's Improved , globe-shaped, with a small top and tap root	10	20	50
Skirving's , an improved purple-topped variety of large size	10	15	50

For the Spring crop, commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots to the depth of an inch or more, and give them a light dressing of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens, where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early, so that they may have time to grow of a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crop, sow from the middle of July to the last of August, in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast, though much larger crops are obtained by drill culture.

Sweet, Pot and Medicinal Herb Seeds.

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up; or the seeds may be sown under glass and the young plants afterwards transplanted to their respective beds. The perennial kinds should occasionally be divided and transplanted in Spring.

SWEET, POT AND MEDICINAL HERB SEEDS—Continued.

	Per oz.
Anise (<i>Pimpinella anisum</i> ,) an annual, cultivated for its seed and its leaves, which are used for garnishing and for seasoning	\$0 10
Balm (<i>Melissa officinalis</i> ,) a hardy perennial, used for making balm tea and balm wine	30
Basil, Sweet (<i>Ocimum basilicum</i> ,) This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces	20
enne (<i>Sesamum orientale</i>)	15
Borage (<i>Borage officinalis</i> ,) hardy annual, sometimes used as a pot-herb, and also for garnishing, but chiefly required for claret cup and other cooling drinks. Bees are very partial to the flowers	15
Caraway (<i>Carum carui</i> ,) hardy biennial, cultivated for its seed, which is largely used in various kinds of confectionery and for giving flavor to liqueurs	10
Catnip (<i>Nepeta cataria</i> ,) perennial	40
Coriander (<i>Coriandrum salivum</i> ,) an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine	10
Dill (<i>Anethum graveolens</i> ,) annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickled cucumbers to heighten the flavor. Medicinally they are good for flatulence and colic in infants	10
Fennel (<i>Anethum feniculum</i> ,) hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces	10
Horehound (<i>Marrubium vulgare</i> ,) hardy perennial, principally used for medicinal purposes	20
Hyssop (<i>Hyssopus officinalis</i> ,) hardy perennial; the leafy tops and flowers are used for making hyssop tea	15
Lavender (<i>Lavandula spica</i> ,) a popular aromatic herb	20
Majoram, Sweet (<i>Origanum Marjorana</i> ,) for seasoning	20
Opium Poppy (<i>Papaver somniferum</i>)	20
Rosemary (<i>Rosmarinus officinalis</i> ,) an aromatic herb	30
Rue (<i>Ruta graveolens</i> ,) used for medicinal purposes, also frequently given to fowls for the croup	15
Saffron (<i>Carthamus tinctorius</i>)	10
Sage (<i>Salvia officinalis</i> ,) much used for flavoring various articles of cookery. It is also possessed of medicinal virtues. Tea made from its leaves is a sudorific, causing profuse perspiration	15
Summer Savory (<i>Satureia hortensis</i> ,) annual. It has medicinal and culinary uses. Its aromatic leaves are much esteemed in salads and soups	15
Sorrel, Broad Leaved , used in salads	15
Thyme, Broad Leaved English , hardy perennial. Thyme is used in various ways, for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headache	35
Tarragon Roots, each	35
Tansy (<i>Tanacetum vulgare</i>)	30
Wormwood (<i>Artemisia absinthium</i> ,) used for medicinal purposes; it is also beneficial to poultry, and should be planted in poultry grounds	30

GRASS SEEDS.

These Prices are Subject to Variation.

Blue Grass Kentucky , (<i>Poa pratensis</i> ,) extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn	Per lb. \$0 18
	Per bushel of 14 lbs. 1 75
Creeping Bent Grass, Florin (<i>Agrostis stolonifera</i> ,) used by many for lawns, also well adapted to moist places	Per lb., 35c., per bushel of 15 lbs. 4 50
Crested Dogtail (<i>Cynosurus cristatus</i> ,) good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre. Per lb.	65
Hard Fescue (<i>Festuca duriuscula</i> ,) admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre; 12 lbs. to the bushel (By bushel, 20c.)	Per lb. 25
Meadow Fescue (<i>Festuca pratensis</i> ,) this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre	Per lb. 25
Sheep's Fescue (<i>Festuca ovina</i> ,) does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre (By bushel, 20c.)	Per lb. 25
Meadow Foxtail (<i>Alopecurus pratensis</i> ,) regarded as one of the most desirable grasses for permanent pasture, being early and rapid in growth. 25 lbs. to the acre (By bushel, 30c.)	Per lb. 35
Meadow Soft Grass (<i>Holcus lanatus</i> ,) will grow with little or no care in any soil; it is chiefly cultivated where the better grass will grow. 3 bushels to the acre; 7 lbs. to bushel. Per bushel, \$1.40. Per lb.	22
Orchard Grass (<i>Dactylis glomerata</i> ,) is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in Autumn than any other. 3 bushels to the acre; 14 lbs. to the bushel	Per bushel 2 50
Red Top Grass (<i>Agrostis vulgaris</i> ,) good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Per bushel of 14 lbs.,	1 50
Fancy Red Top Grass , cleaned like Timothy; free from chaff	Per lb. 15
Rhode Island Bent Grass (<i>Agrostis canina</i> ,) best of all grasses for lawns where only one variety is used	Per bushel of 12 lbs. 3 50

GRASS SEEDS—Continued.

Rye Grass, English (<i>Lolium perenne</i> .) Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass per lb. 15c.	Per bushel of 24 lbs.	\$3 00
Rye Grass, Italian , (<i>Lolium Italicum</i> .) This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state	Per lb. Per bushel of 18 lbs.	12 1 75
Sweet Vernal Grass (<i>Anthoxanthum odoratum</i> .) is not valuable when sown alone, but when sown with other grasses it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass	Per lb.	1 25
Tall Meadow Oat Grass (<i>Avena elatior</i> .) very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand, and is much valued in the South.	25c. lb. Per bushel of 13 lbs.	2 25
Timothy, Herd's Grass (<i>Phleum pratense</i> .) As a crop to cut for hay this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can, with care, be made to produce fair crops. Price according to market. 45 lbs. to bushel.		
Rough Stalked Meadow Grass (<i>Poa trivialis</i> .) produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre. Per lb. 45c. Per bushel		6 00
Wood Meadow Grass (<i>Poa nemoralis</i> .) This grass grows well both on shady and exposed situations. 30 lbs. to the acre	Per lb.	60
Yellow Oat Grass (<i>Avena flavescens</i> .) good for dry pastures and meadows. Is much relished by sheep	85c. lb. Per bushel of 8 lbs.	6 50
Golden or German Millet. This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured, gives general satisfaction. Three pecks to the acre	Per bushel of 48 lbs., price variable.	
Hungarian Grass , a valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather the least rain will restore it to vigor. Sow broadcast. Three pecks to the acre	Per bushel of 48 lbs., price variable.	
Muzzy Bros.' Fine Mixed Lawn Grass , composed of a mixture of the finest grasses; sow four to five bushels per acre	15c. qt. Per bushel	3 00

HOW TO MAKE A LAWN.

The ground ought to be carefully prepared during the Winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to the depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller, and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing, the scythe should be used in preference to the machine. *Frequent mowing and rolling are indispensable to maintain the turf in good order.* By adopting these means a close greensward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake, and rolling afterwards. A slight dressing of manure, late in Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

Muzzy Brothers' Celebrated Lawn Grass.

				QUANTITIES TO BE USED.		Price \$0
Plot 20 feet by 20 feet, sow 1 quart						15
" 25 " 50 " 4 "						50
" 25 " 100 " 8 "						75
" 1 acre, sow 3 bushels					Price, per bushel,	3 00

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use also our Lawn Dressing, which can be raked in.

				QUANTITY REQUIRED OF OUR CELEBRATED LAWN DRESSING.		Price, \$0

Clovers.

(Subject to variation in price.)

	Per lb.	Lots 25 lbs. Per lb.
Red Clover, Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.		
Red Clover, Large, or Pea Vine. Price variable.		
White Clover (<i>Trifolium repens</i>)	\$0 35	\$0 30
Alfalfa or Lucerne , requires a deep rich soil, and in such will produce several crops every season. Fifteen pounds to the acre	20	15
Alsike, or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre	22	19
Crimson, or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes a very early fodder, and is excellent for soiling. Twenty pounds to the acre Price variable.		
Bokhara Clover (<i>Melilotus alba</i>), affords excellent feed for bees; it is a valuable soiling plant; lasts two years. Ten pounds to the acre	25	22
Yellow Trefoil (<i>Medicago lupulina</i>). Hop clover. Fifteen pounds to the acre	20	12

Grains.

(Prices of Grains are subject to change with the market).

All grains are selected expressly for seed, and are strictly pure and true to name.

SPRING WHEAT, 60 lb. Bushel.

Saskatchewan Fife	Per bush.
China Spring , chaff bearded variety, and a general favorite	\$1 75
Mediterranean Spring . This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended. Is bearded, yields well, and the kernels are larger than those of other Spring varieties	1 75
White Russian . This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 62 lbs. to the bushel. Has produced 40 to 50 bushels to the acre	1 75
	2 00

WINTER WHEAT, 60 lb. Bushel.

Jones Winter Fife , surpassing all other varieties in hardiness and productiveness	1 75
Golden Gross , has the yield of the Clawson, with flour of the Mediterranean	1 75
Clawson , also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other	1 75
Fultz . A beardless amber variety, grown largely in some sections of Pennsylvania, and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour	1 75
Red Mediterranean (American) . This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early	1 75

OATS, 32 lb. Bushel.

Swedish , heavy and bright color	} Prices on application.
Washington , very popular, and standing well until fully ripe	
Probsteier , very productive and heavy. The straw is very strong. No. 32	
Scotch , one of the leading varieties	
Welcome	

RYE, 56 lb. Bushel.

Spring Rye	1 25
Winter Rye	1 00

SPRING BARLEY, 48 lb. Bushel.

Vermont Champion (Two-Rowed)	1 25
---	------

BUCKWHEAT, 48 lb. Bushel.

Silver Hull variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions Per bushel, \$1 20

Ordinary Dark Grain " 1 00

JAPANESE BUCKWHEAT.

Yields twice or three times as much as the Silver Hull and ripens a week earlier Per bushel, \$1 20

Peas	1 qt. to 100 ft. "	Pepper	1 oz. to 2000 "
Dwarf Beans	1 qt. to 100 ft. "	Tomato	1 oz. to 2000 "

Cultivation of Flower Seeds.

HARDY ANNUALS.

No class of plants or flowers is so easy of cultivation as Hardy Annuals; their brilliant and varied colors and the readiness with which they adapt themselves to almost any soil or situation have rendered them general favorites.

Successive sowings may be made from March to the end of September; March, April and May are the best months for a general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine, dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or, in the absence of these, a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose water pot.

Separate the plants when large enough to handle, and finally plant out in May, as soon as the weather is sufficiently warm, where intended to flower. The seed can be sown in the open ground in May and June.

Balsam.

Briza—Quaking Grass.

Carnation.

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and, in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autumn are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena, Vinca and others.

A General Fertilizer Suitable for Every Crop.

Stands ahead of anything in the market in Analysis, Selling Price and Results. The Great Satisfaction this Fertilizer has given our Customers, being so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

“SWIFT=SURE” PHOSPHATE

BEST FERTILIZER EVER MANUFACTURED.

GUARANTEED ANALYSIS.

Ammonia	3 to 5 per cent.	Soluble and Precipitated Phosphoric Acid, 9 to 11 per cent.
Potash	4 to 6 “	Insoluble Phosphoric Acid 5 to 6 “
Per ton (10 bags), \$33.00; per bag (200 lbs), \$3.50.		

“SWIFT=SURE” SUPER-PHOSPHATE

FOR POTATOES.

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which, for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato Manure made from first-class material, like our “**SWIFT-SURE**” **SUPER-PHOSPHATE FOR POTATOES**, you can grow a larger crop of Potatoes than you can with barnyard manure, and have them smoother, freer from imperfections, and of more uniform size.

GUARANTEED ANALYSIS.

Ammonia	3 to 4 per cent.
Soluble and Precipitated Phosphoric Acid	9 to 12 “
Insoluble Phosphoric Acid	5 to 6 “
Per ton (10 bags), \$33.00; per bag (200 lbs.), \$3.50.	

MUZZY BROS.' GUANO

FOR TOMATOES, TRUCK AND CORN.

GUARANTEED ANALYSIS.

Ammonia	2 to 3 per cent.
Avail Phosphoric Acid	8 to 9 “
Potash (actual)	5 to 6 “

This Guano is also made from excellent materials, and while not so high a grade as our “Swift-Sure,” neither does it cost as much. **TRY IT!**

Per ton (10 bags), \$28.00; per bag (200 lbs.), \$3.00.

MUZZY BROS' SPECIAL FERTILIZER

FOR GENERAL CROPS.

Analysis: **Ammonia**, 3 to 4 per cent. **Phosphoric Acid**, 10 to 12 per cent. **Potash**, 4 to 6 per cent. An excellent Fertilizer for General Crops. Per ton, \$31.00; per bag, \$3.25.

THE OLE OLSEN LAWN RAKE

(PATENT APPLIED FOR)

Is Made on Scientific Principles, combining Lightness, Neatness—Strength and Durability.

A LEADING SELLER FOR 1902.

The knob on end of teeth, set by our patent process, absolutely prevents the teeth from dropping out.

Note particularly curved head. Teeth are close set and clinched.

Price, 50c.

The **Curved Head** admits of only four to six teeth coming in contact with the surface of the lawn, the teeth on either side of the center performing their work perfectly, without touching or tearing up the lawn. This feature makes the Ole Olsen Rake unapproachable for light draught; also the head being curved, in raking throws the materials toward center of rake and makes it easy to handle. The Rakes are also furnished when desired with **Straight Heads**.

The **Teeth** are made of extra selected stock, and so constructed that when driven into the head they will **never shrink from place and cannot fall out**. They have an even taper, and in use acquire a high polish. They cannot bend, and therefore will not clog and bind like a metal tooth.

Price, complete, - - - - \$10.00
" as a drill only, - - - - 8.00

We are pleased to offer for 1903 a new combined tool of great excellence, which we can scarcely recommend too highly. It combines conveniently in a single garden implement a capital hill dropping and a continuous row seeder with the most perfect and complete wheel hoe, cultivator, rake and plow that the most practical can desire. Designed by a practical man, it is light, compact, durable and easy running, and does all its great variety of work with a thoroughness and perfection that has never before been attempted, much less equaled.

"Planet Jr." No. 5.
MARKET GARDENER'S HILL DROPPING
SEED DRILL.

Price, - - - \$12.50

A Good Drill Is one of the most important of all the market gardener's tools, and is often invaluable to the farmer. It "pays at bothends;" it saves labor and seed in planting, work and worry in hoeing, and makes a larger and more even crop.

No. 7 "Planet Jr." All Steel Horse Hoe and Cultivator.

This Horse Hoe is the No. 8 without the depth regulator and with a slightly different lever wheel. It works the same as No. 8 in every way, except that it lacks the perfect steadiness and absolute control of depth made possible by the depth regulator.

No. 7 Horse Hoe.
Price, with attachments as in cut,
\$7.50.

No. 8 "PLANET JR." same as
No. 7, with addition of depth
regulator. Price, \$8.00.

No. 5
"Planet Jr."
All Steel Horse Hoe
and Cultivator.

Practically the same implement as No. 7, except wheel lever; it is our leader.

Price, - - - \$6.00

"PLANET JR." No. 12

**Double Wheel Hoe,
Cultivator
and Plow.**

THE "Planet Jr." Double Wheel Hoe is a great favorite, especially for field work. It hoes both sides of the row at once at the speed of a moderate walk.

A wheel hoe should be double or at least be capable of hoeing both sides of a row at one passage. Any inequalities can be accurately followed when straddling but one row, while between two the tool must work the narrowest points, and therefore be quite too narrow for the wider parts; nor can a person watch two rows and work them as closely as one, even if planted accurately.

PRICE, - - - \$6.50.

"PLANET JR." No. 17.

Cultivator and Large Garden Plow.

SINGLE WHEEL HOES.

SINGLE Wheel Hoes are lighter than the double, but do almost the same variety of work, though in a different way, being used mostly between the rows instead of straddling them. Yet by attaching the wheel to the other side of the arm, No. 17 can be used to hoe both sides of the row at once while the plants are small—the most important time.

For 1903 we offer our latest single Wheel Hoes, as the highest type of their class, superior to any of the old styles. They have the greatest variety of tools we have ever offered. These adapt the implements to a greater variety of crops, and to work at many different distances apart; there is scarcely any garden culture of which they are not capable.

The Handles are adjustable in height. The frame is convenient and strong, with quick change device, which permits the tools to be changed without removing the nuts. This device is used on both our double and single wheel hoe frames. hoe "both sides at once."

The Wheel can readily be changed in height and to the far side of the frame to

PRICE, Complete, - - - \$4.50.

The "Planet Jr." Twelve-Tooth Harrow, Cultivator and Pulverizer.

Price, Plain, \$5.30; with Wheels, \$6.40; Complete, \$8.00.

This tool has grown remarkably in favor, owing to its neatness and perfect work.

THE FARMER uses it in deep or close cultivation of potatoes, corn, etc., when small, or when desiring to work the crop thoroughly without hilling.

THE STRAWBERRY GROWER, to keep the ground loose and to work up and bed the runners; the round-throated teeth lift them and turn them aside without injury; ready to root the mellow soil, which is thoroughly prepared by the numerous small teeth.

THE BEAN RAISER uses it while the crop is small with the greatest satisfaction and benefit, and all through the season it is invaluable.

THE MARKET GARDENER finds it the most useful one-horse tool he owns. It narrows in an instant or widens. Cuts deep or shallow, is thorough but gentle in its action, steady running, and is useful everywhere.

Hitchcock Potato Digger and Shovel Plow Combined.

Patented Dec. 23, 1884.

Fire-Fly Garden Plow.

Price, \$2.25.

Packed weight 13 lbs.

This Tool is Exceedingly Useful to owners of small gardens. **It will throw a furrow four to six inches wide and one to three inches deep.** Furrows for manure or seeds can be opened and covered. **In cultivating,** plow away, weed and plow back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden. **Chicken Raisers** find it of great advantage in *plowing up their scratching yards.*

MOUNTED GRINDSTONE.

This implement, though very simple in appearance, is the result of much study and many experiments; and it is as near perfect as can be attained and come within the reach of every farmer. The sale of several thousand during the past few years proves it a success. By the changing of one bolt it may be converted either into a **SHOVEL PLOW,** or **POTATO DIGGER.** The fingers are adjustable, being held in position by the plow point. Thus, in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are made of steel, rendering it light, strong and durable.

We furnish three sizes, No. 1, No. 2 & No. 3.

No. 1, \$5.00; No. 2, \$4.50; No. 3, \$4.00.

Price, Potato Digger, \$7.00;

Combined with Shovel Plow, \$9.00.

Embodied in the

ALL METAL "TIGER" SELF-DUMP RAKE.

1. Tubular thills or shafts gracefully curved to insure greatest comfort to horse. Adjustable for one or two horses. 2. Metal platform, firmly riveted together; no bolts to get loose or platform to rot, warp or become shaky. 3. Spring steel seat support, with extra large comfortable steel seat, making it a pleasure to ride. 4. Powerful steel angle cleaner bar, able to stand the severe strain to which it will be subjected. The rake will never sag, as the steel will be just as good and strong after five or ten years' service as when new. 5. Tempered oval steel cleaners fastened in cleaner bar with nut. They will not break or pull out. 6. Flanged steel tooth guide and angle steel head. No splitting or warping. 7. Solid lump wheel, with our old reliable lifting latch, which cannot be equalled for efficiency. 8. Steel wheel, with $1\frac{3}{4}$ inch tire, 16 spokes. Our own make. 9. A divided lever, which obviates all danger to the operator. 10. A convenient hand-dumping lever to used when needed. 11. A lever connection with five changes for different heights of teeth to suit any kind of work. 12. The trip chain is convenient for children, so that any boy or girl, who can drive a horse, can use the Rake.

Made in three sizes, 8, 10 and 12 foot, and with teeth three or four inches apart.

THE CHAMPION Vegetable Cutter.

No. 1. Weight 120 lbs., for Hand Power. Price, \$8.50

No. 2. With pulleys, for Horse Power. Price, \$15.00

This machine is simple in construction, strong and durable, and prepares Pumpkins, Turnips, Beets, Carrots, etc., so as to be fed to stock without danger of choking them. The machine will cut by hand from one to two bushels per minute. The hooked teeth are upon rings that are easily put upon the shaft, and furnished, when required, at 30 cts. each.

Grape and Apple Grinder.

This Grinder is well adapted to grind any Fruit, particularly Grapes, separating seeds from the pulp, and large enough to grind 4 to 6 bushels of Grapes in one hour. Has Steel Pins firmly fastened in Wood Roller, also on both sides of the box; no berries can escape.

Made in Oak Wood, Varnished, Galvanized Iron parts. Top of Box or Hopper is 16 in. x 9½ in. The cross arms are 25 in. long. Inside Roller 5½ in. x 7½ in.

Price, \$2.98.

Grape or Berry Mill.

This Mill is used for Crushing and Grinding of Grapes and Berries. Has two large Corrugated Rollers inside, and capable of grinding from 8 to 10 bushels of Grapes, Berries, etc., in one hour. Size of Corrugated Rollers, each 9 in. x 4½ in. Cross arms 29 in. long and 15 in. wide. In Oak Wood, Varnished.

The iron Wheel is 13 in. diameter and weighs 20 lbs., and iron cog wheels. Iron work is painted black.

Price, \$4.98.

F. W. Mann Co's Patent Bone Cutters

No. 5, B.

Are absolutely the first Bone Cutters ever sold to the public, and they are by far the most successful hand and power machine on the market to-day for cutting up green bones.

Original Invention.

Nine years of practical use among poultrymen has only served to increase their popularity and prove their necessity.

Old Methods a Failure.

Before the advent of the Mann Cutter, bones for poultry food were broken up with a hammer or reduced in mills constructed with chilled or cast-iron plates. This process, while possible with burned or thoroughly dried bones, was a total failure for bones as they come from the market.

Corrugated Knives.

Our machine introduced for the first time corrugated knives of the finest tool steel, accurately tempered, which enable us to cut the hardest bone, either dry or fresh from the market, with ease and without injury to the knives. These knives retain a good cutting edge, without grinding, for two or three months of ordinary use. They are adjustable to cut finer or coarser, can be easily removed when dull, and can be sharpened on a common grindstone, the same as a carpenter's chisel.

Combined Barrel, Truck and Hand Cart.

When we consider the almost innumerable uses to which our combined Truck and Hand Cart can be applied, its "handiness," and the immense amount of time and hard labor saved by its use, it is not a matter of surprise that it is steadily growing into popular favor. It is one of those articles that causes the user to wonder how he ever did without it, as

it really becomes indispensable when once used.

The barrel is raised from the place desired, and instantly detached, all without handling. The weight being balanced over the axle, no lifting or down pressure is needed in transportation.

Other barrels for various purposes can be used as needed, extra trunnions being furnished, if desired, which can be readily attached to any oil or spirit barrel, thus increasing indefinitely the value of the Truck.

We have wheels of 1½, 2½ and 4 inches tread, but always send Trucks with Wheels, 1½ inches, unless otherwise specified.

We also supply a box without trunnions and spring catch, making a very superior dumping Hand Cart.

No Castings to break; all irons of best wrought.

Very stiff, handsome, compact, low in price.

Furnished with or without Barrel or Box, as ordered.

As shown by the cuts on this page, we have recently largely increased the usefulness of our Barrel Truck by the addition of a first-class Sprinkler and Force Pump, both being sold as attachments and easily applied to barrel.

FIG. 48.

THE ECLIPSE ATOMIZER.

The Biggest Little Bug-Killer on Earth.

THE Eclipse form of tank is shown in cut, and experience shows that it is the best form. Many forms have been attempted that show in practice fatal objections; a notable one being the conical one with point downward, which is easily understood by the explanation that Paris green and other poisons are insoluble, and only held in suspension in the water and settle very rapidly; the method of agitation in atomizers being to shake frequently. Now, when allowed to settle, even for a minute, in a conical can, it concentrates very rapidly and is very soon strong enough to kill any foliage, so with the least neglect it becomes a plant-killer instead of a plant

BRASS FORCE PUMP.

The American Standard Hand Corn Planter.

THE UNIVERSAL FAVORITE.

The only Planter containing an adjustable dropping disk. The disk is quickly adjusted for a light or heavy seeding, and rotates similar to the disk in a Horse Planter. The Planter is easily operated by a BOY or GIRL. Works in all kinds and conditions of soil, and is the only one which insures an accurate and reliable seeding. Try one; it speaks for itself.

No. 4. A medium to heavy dropper. For a general purpose Field Corn Planter it has no equal. It is the favorite of this series, and its sales exceed those of all other planters ever manufactured combined. Price, \$1.50.

Darnell's Patent Furrower and Marker

(IMPROVED).

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus *increasing the work instead of lessening it.*

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows, while he opens one in clean ground, *and do it better.*

Price, With Large Disks, \$18.50.

BRYAN GRANT FAN MILLS.

No. 1, with 5 sleeves, 14x18 inches	\$13 00
" 2, " 5 " 16x18 "	15 00
" 3, " 5 " 16x20 "	18 00

The "BOSS" Solid Steel Drag Scraper.

Pat. Nov. 4, 1897, and March 24, 1885.
Best and Cheapest Scraper in the Market.

No. 1. Capacity 7 cubic feet . . . \$7 00
No. 2. " 5 " 6 50

These Scrapers are made from heavy plates of especially hardened steel, and are stamped from one sheet without joint, seam or rivet. They are superior to any other Drag Scraper upon the market, the "Columbus" Solid Steel Scraper alone excepted. The bowl being made of thicker and harder steel, enables it to scour where no other Scraper will; and owing to the sharp, rounded nose, it will enter the ground more rapidly than any other make of Scraper. The BALLS are STEEL, with perfect working swivels, and handles of hard wood. We will guarantee this Scraper in every particular. Made in three sizes.

Dairy Pans in Tin and Granite, all sizes.

Extra Heavy Boxes, for Milk Bottles, with Hinged Lid, removable inside partitions, to facilitate cleaning, will hold 12 quarts or 24 pints. Bottle Brushes.

Dash Churns, all sizes, prices from \$1.49.

THE BLANCHARD CHURN

The body of the Churn being cylindrical, all the cream is churned alike and at the same time, making streaked butter impossible. Those who desire to make butter on what is called the "granular system" can do it perfectly with the Blanchard Churn. If we were disposed to follow the example of some of our competitors, we could add page after page of "unsolicited" testimonials as to the accuracy of these claims; but we simply point to our past record and to the absolute guarantee under which all our sales are made.

THE FAIRFIELD LAWN SWING.

Easily leads all others in the market for the following reasons:

FIRST: Because it is built upon the best

mechanical principles—and this combines the maximum of strength with the minimum of weight, and weds safety to durability.

Its notable lightness makes it easy to handle, while a scientific construction renders it remarkably easy to operate, and secures to it a peculiarly attractive and pleasing appearance.

'Tis "Fair" to claim that nothing now in the "field" equals the

PALMER'S PATENT HAMMOCKS.

THE superiority of this invention, comprising all the requisites of a perfect Hammock, will be apparent upon investigation. The theory upon which they are made gives greater strength and durability than can be obtained with the same amount of material by any other method. The novelty and comfort of the Pillow and Spreader cannot be appreciated. They are highly ornamental, and as well adapted to indoor as outdoor use. All Hammocks are tested with weight of two persons.

TWIN COMET LAWN SPRINKLER.

Covers Greater Area Than Any Other Sprinkler Made. Height, 17 inches; Weight, 6 pounds.
 ...Price, \$5.00...

Will sprinkle an area four times greater than any other Sprinkler made.

THE "WATER WITCH" LAWN SPRINKLER.

PATENTED NOVEMBER 5, 1889.

In constructing this device the main object was to produce a sprinkler that would scatter the water **more evenly** and over a **larger area** than would any other sprinkler. This purpose has been fully realized in the "**Water Witch.**"

The water flows through the nozzle with **unimpeded** force, and is divided and deflected by the two lips of the swivel piece, which it causes to revolve rapidly, scattering the water in **fine drops** and **evenly** over a circular area of **twenty-five** to **forty** feet diameter.
